

Harry,

Debbie Cummings indicated you called regarding our letter 5100, Ser 3540/0344, dated 11 October 2006 asking for additional enclosures.

The letter was signed out indicating that one enclosure was attached. Additional enclosures were not intended to be attached.

Enclosure (1) was a draft that included references to other enclosures. We included these references in our notes to track where we obtained our information for internal use only. They were meant to be deleted from the final version.

I took out the extraneous enclosure references in the enclosure to the letter and attached it to this email.

I hope this helps.
